## Partner Development Tools

### IEXS Saving – More than just trading

The growth of our clients' capital has always been of great importance to us in order to achieve the maximum benefit for them. "IEXS SAVINGS" is a new advantage that complements our clients' portfolios, benefiting from the interest returns generated by investment banks and hedge funds partnered by the IEXS Group to automatically enter into currency fund liquidity swaps for all IEXS clients' available margin at the daily overnight market settlement. This has resulted in the introduction of "IEXS SAVINGS" and the leveraging of this new advantage back to our valued clients, securing long-term and solid savings interest for them. The unlimited deployment of funds and interest gives clients maximum freedom to earn an additional income. "IEXS SAVINGS" is a fund management service and is available to all clients, allowing you to invest and trade while earning a steady stream of interest on your account, with daily settlements to maximize the benefits of your investment. With an annualized interest rate of up to 5%, clients can easily earn daily interest on their savings with an available margin of more than USD 5,000 in their trading account.
